auckland smart city: thinking beyond the technology-led urban utopia

wolfgang drechsler
FinEst Twins – Smart Cities
Tallinn and Helsinki
NYZ $56 million Smart Cities Center of Excellence est. today
The Smart City is the ICT City and a form of e-Governance
Traffic, environment, health problems beautifully solved
But all technology is ambivalent
Technology = progress?
No reason to think so
So the question remains, when is the Smart City a Good City?
The Smart City, in the end, does seek total control.
James Madison

Immanuel Kant

The Western Constituent State

Image of Human Person

Kantian Anthropology

Enlightened Individual
Power and counter-power in the digital society
cui bono?
“first we use technology, then technology uses us”

“technology does not serve mankind but itself”

Friedrich Georg Jünger

Die Perfektion der Technik

Vittorio Klostermann
Engineers

Businessmen

Politicians
a tendency to solutionism
but Democracy is a conscious decision against expert rule
Agencies are coming together to deliver seamless, anticipatory and personalized services for citizens and businesses.
Πολιτεία II 369-373, esp 372d, 373c
Von den Sowjetmenschen lernen, heißt siegen lernen!
“seamless”
“data-driven”
“evidence-based”
(→ “evidence-informed”)
"Plato's Cave"
by Joan Thornborrow-Steacy
code
Global Commons of Design, Knowledge, Software, Culture
looking for some quiet reflection?
“The good is the most accurate measure of all things”
